

LuxaPost

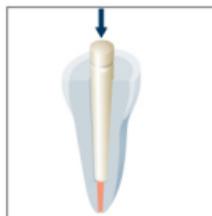

Quick guide for Use with LuxaBond-Total Etch and LuxaCore Z-Dual

Determine preparation depth and post length.

Prepare the root canal with the corresponding drill.

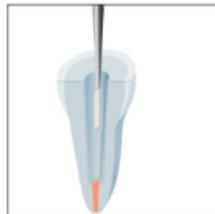

Clean and dry. Try the post in.

Etch enamel (20 - 60 s) and dentin (max. 15 s).

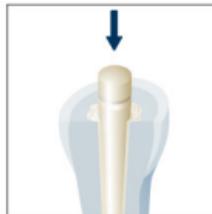

Rinse. Remove excess water. Do not desiccate tooth substance.

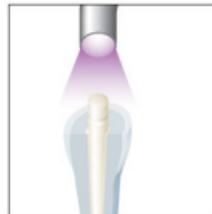

Apply LuxaBond. Remove excess material. Air blow gently.

Apply LuxaCore Z-Dual into the canal lumen.

Insert the LuxaPost.

Light cure for 20 s.

Build-up core with LuxaCore Z-Dual and light cure.

Please consult the enclosed instructions for use for further information.
