

Identifying the Proper Grit to Combat Staining

Traditional prophy paste is the most common material for stain removal, but for patients with coronal staining it is important to identify the type of stain in order to determine which products to use:

PROPER GRIT	INDICATION	WE'VE GOT YOUR GRIT
<p>FINE</p> 	<ul style="list-style-type: none"> ✓ Mild staining ✓ Extrinsic staining ✓ Primary dentition ✓ For use on composites 	<p>#788401 Triple Mint, Fine #788417 Bubblegum, Fine #788408 Carnival Pak, Fine</p>
<p>MEDIUM</p> 	<ul style="list-style-type: none"> ✓ Moderate staining ✓ Polishing ✓ Plaque removal ✓ Adult dentition 	<p>#788402 Triple Mint, Med. #788406 Cherry Burst, Med. #788409 Carnival Pak, Med. #788415 Cinnamon & Mint, Med.</p>
<p>COARSE, X-TRA COARSE</p>	<ul style="list-style-type: none"> ✓ Aggressive staining (tobacco, heavy plaque) ✓ Adult dentition ✓ Enamel polishing 	<p>#788403 Triple Mint, Coarse #788404 Triple Mint, X-tra Coarse #788407 Cherry Burst, Coarse #788416 Cinnamon & Mint, Coarse</p>
