Honigum Pro

Honigum Pro is the only VPS impression material system that:

- **Goes where you want it**
- **Stays where you place it**
- **Has the unique ability to thin under load**

Thanks to its true thixotropic formula, the material won't slump or run but remains stable where you place it, making it the ideal material for taking precise impressions, especially implant impressions.

Plus, with unmatched flowability, it makes its way into tiny crevices and hard-to-reach areas that others can miss, and its remarkable strength saves valuable time by preventing the need for retakes.

The better the impression, the better the restoration.
